

NAREDDY POOJITHA

Email: poojithanareddy@gmail.com | Phone: +91 8187017268 | Hyderabad, Telangana, India

PROFESSIONAL SUMMARY

Machine Learning Engineer with hands-on experience in building, training, evaluating and deploying machine learning and deep learning models. Skilled in Python, TensorFlow, PyTorch and Scikit-learn, with a strong foundation in statistics, feature engineering and model optimization. Experienced in taking models to production using Flask, FastAPI, Docker and AWS. Looking for an ML Engineer role to solve real-world problems with data.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, C++, Java
- **Machine Learning:** Supervised and Unsupervised Learning, Regression, Classification, Clustering, Random Forest, XGBoost, SVM, Model Evaluation, Hyperparameter Tuning
- **Deep Learning:** Neural Networks, CNN, RNN, LSTM, Transformers, TensorFlow, Keras, PyTorch
- **Libraries and Tools:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, OpenCV, NLTK, spaCy, Hugging Face
- **MLOps and Deployment:** Flask, FastAPI, Docker, Git, GitHub, MLflow, AWS (EC2, S3, SageMaker), CI/CD
- **Databases and Big Data:** MySQL, PostgreSQL, MongoDB, Apache Spark
- **Concepts:** Feature Engineering, Data Preprocessing, Model Deployment, REST APIs, A/B Testing, Statistics, Linear Algebra

PROFESSIONAL EXPERIENCE

Machine Learning Engineer Intern - TechNova Solutions, Hyderabad

June 2025 - December 2025

- Built and trained classification and regression models using Scikit-learn and XGBoost, improving prediction accuracy by 12%.
- Developed a deep learning image classification model using TensorFlow and CNN, reaching 93% validation accuracy.
- Performed data cleaning, feature engineering and hyperparameter tuning on datasets with over 500,000 records.
- Deployed trained models as REST APIs using Flask and Docker on AWS EC2, reducing inference time by 30%.
- Tracked experiments and model versions with MLflow and collaborated with the team using Git and GitHub.

PROJECTS

AI Resume Analyzer using NLP and Machine Learning

- Built an application that extracts skills from resumes and predicts the best matching job role with a match score.
- Used spaCy and NLTK for text preprocessing, TF-IDF for feature extraction and cosine similarity for role matching.
- Deployed the app using Streamlit with skill gap analysis and improvement suggestions. Tech: Python, NLP, Scikit-learn, Streamlit.

Customer Churn Prediction

- Trained Logistic Regression, Random Forest and XGBoost models to predict customer churn, achieving an F1-score of 0.87.
- Handled class imbalance using SMOTE and explained model results using feature importance and SHAP.

Sentiment Analysis using LSTM

- Created an LSTM based text classification model in PyTorch to classify product reviews, reaching 91% accuracy.
- Applied tokenization, word embeddings and dropout to improve generalization and reduce overfitting.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (AI and ML)

Jawaharlal Nehru Technological University, Hyderabad | 2022 - 2026 | CGPA: 8.6 / 10

CERTIFICATIONS

- Machine Learning Specialization - Coursera (DeepLearning.AI)
- Deep Learning Specialization - Coursera
- AWS Certified Cloud Practitioner

ACHIEVEMENTS

- Secured top 10 rank in a college-level machine learning hackathon.
- Solved 200+ problems on LeetCode and HackerRank in data structures and algorithms.
